Interview Summary

 Application No.
 Applicant(s)

 10/516,448
 WARD, LUKE

 Examiner
 Art Unit

 FLIZARETH BURKHART
 1215

All participants (applicant, applicant's representative, PTO personnel): (1) ELIZABETH BURKHART: (2) Robert Voiat. (3)		ELIZABETH BURKHART	1715					
(2) Robert Volat: (4) Date of Interview: 20 December 2010. Type: a) ☐ Telephonic b) ☐ Video Conference c) ☐ Personal [copy given to: 1) ☐ applicant 2) ☐ applicant's representative] Exhibit shown or demonstration conducted: d) ☐ Yes e) ☐ No. If Yes, brief description: Claim(s) discussed: 1. Identification of prior art discussed: Goodwin (WO 02/28548) and Badyal (WO 98/58117). Agreement with respect to the claims f) ☐ was reached. g) ☐ was not reached. h) ☐ N/A. Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussed proposed arguments concerning Badyal being directed to a quasi-phase plasma system. The arguments were not found persuasive. Since Goodwin discloses that the coating material may be liquid or gaseous (p. 4, line 9) to deposit the coating, one would have reasonably expected the coating material to react similarly in either phase in the polsama system of Goodwin. Since Badyal discloses the same coating material to 1 a last Goodwin and that it reacts advantageously to pulsed plasma to provide greater structural retention in the film, it would have been obvious to incorporate the pulsed plasma to provide greater structural retention in the film, it would have been obvious to incorporate the pulsed plasma of Badyal line the plasma system of Goodwin to achieve such advantages. Note that the prior art does not need to recognize the same problem as the present invention. I.e. trapped molecules within the droplets, since the solution would naturally flow from the suggestion in the prior art, i.e. pulsed plasma to provide greater structural retention in the film. It would have been obvious to incorporate the pulsed plasma to provide greater structural retention in the film. It would have been obvious to incorporate the pulsed plasma to provide greater structural retention in the film. It would have been obvious to incorporate the pulsed plasma to provide greater structural retention in the film.	All participants (applicant, applicant's representative, PTO	personnel):						
Date of Interview: 20 December 2010. Type: a) Telephonic b) Video Conference c) Personal (copy given to: 1) applicant 2) applicant's representative] Exhibit shown or demonstration conducted: d) Yes e) No. If Yes, brief description:	(1) <u>ELIZABETH BURKHART</u> .	(3)						
Type: a) Telephonic b) Video Conference c) Personal [copy given to: 1) applicant 2) applicant's representative] Exhibit shown or demonstration conducted: d) Pes e) No. if Yes, brief description:	(2) Robert Voiat.	(4)						
c) Personal (copy given to: 1) applicant 2) applicant's representative] Exhibit shown or demonstration conducted: d) Yes e) No. if Yes, brief description:	Date of Interview: 20 December 2010.							
If Yes, brief description: Claim(s) discussed: 1. Identification of prior art discussed: Goodwin (WO 02/28548) and Badyal (WO 98/58117). Agreement with respect to the claims f) was reached. g) was not reached. h) № N/A. Substance of interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussed proposed arguments concerning Badyal being directed to a gas-phase plasma system while Goodwin is directed to a liquid phase plasma system. The arguments were not found persuasive. Since Goodwin discloses that the coating material may be liquid or gaseous [p. 4, line 9] to depoin the coating, one would have reasonably expected the coating material to react similarly in either phase in the plasma system of Goodwin. Since Badyal discloses the same coating material to 4, line 4) as Goodwin and that it reacts advantageously to pulsed plasma to provide greater structural retention in the film; it would have been obvious to incorporate the pulsed plasma of Badyal into the plasma system of Goodwin to achieve such advantages. Note that the prior at does not need to reconsize the same problem as the present invention, i.e. trapoel plasma (Note that the prior at does not need to reconsize the same problem as the present invention, i.e. trapoel plasma (MPEP 2145 II). Applicant further discussed submitting an affidavit from Dr. Badyal. The Examiner has agreed to consider such when submitted in a formal response. (A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable, if available, must be attached. Summary of Record of Interview Requirements

Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application withere or not an agreement with the examinent was reached at the interview.

Title 37 Code of Federal Regulations (CFR) § 1.133 Interviews

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be field by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1 135 (35 U.S.C. 132)

37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged only promise, stpulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiner's responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed asolely to restriction requirements for which interview recordation is otherwise provided for in Section 912.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiners Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is malied to the applicant's correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate. the Form should be malled ormountly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

- A complete and proper recordation of the substance of any interview should include at least the following applicable items:
- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,
- an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the
- Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,
 - (The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made in the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or minth be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by

Examiners are expected to carefully review the applicant's record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiner's version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, "interview Record OK" on the paper recording the substance of the interview along with the date and the examiner's initials.
